1

Own-source general receipts encompass collections from taxes, current charges, and miscellaneous funding bases (e.g., property sales, special assessments, interest-bearing deposits, and land use fees). The scope of these revenues, however, does not extend to any amounts generated by intergovernmental transfer payments or by liquor stores, utilities, and insurance trust funds falling within the proprietary control of a given state or locality.

With regard to the state-by-state series of per capita values, the largest amount is accorded the lowest rank score and the smallest amount the highest rank score. In the event of tied per capita values, the affected states are assigned the average magnitude of their shared rank positions.

In relation to a particular state, the per capita amount covering all dimensions may vary slightly from the sum of the categorical values because of statistical rounding.

Sources: For the revenue data underlying this exhibit, see U.S. Department of Commerce, Bureau of the Census, "State and Local Government Finances by Level of Government and State: 1996-97" (electronic table), April 2, 2001. Regarding the per capita amounts displayed above, these values have been generated with 1996 population estimates from U.S. Department of Commerce, Bureau of the Census, "State Population Estimates: Annual Time Series, July 1, 1990 to July 1, 1999" (electronic table), December 29, 1999.

1

Own-source general receipts encompass collections from taxes, current charges, and miscellaneous funding bases (e.g., property sales, special assessments, interest-bearing deposits, and land use fees). The scope of these revenues, however, does not extend to any amounts generated by intergovernmental transfer payments or by liquor stores, utilities, and insurance trust funds falling within the proprietary control of a given state or locality.

With regard to the state-by-state series of percentages, the largest value is accorded the lowest rank score and the smallest value the highest rank score. In the event of tied percentages, the affected states are assigned the average magnitude of their shared rank positions.

In relation to a particular state, the percentage covering all dimensions may vary slightly from the sum of the categorical values because of statistical rounding.

Sources: For the revenue data underlying this exhibit, see U.S. Department of Commerce, Bureau of the Census, "State and Local Government Finances by Level of Government and State: 1986-97" (electronic table), April 2, 2001. Regarding the percentages displayed above, these values have been generated with 1996 income estimates from U.S. Department of Commerce, Bureau of Economic Analysis, "Regional Accounts Data: Annual State Personal Income, 1995-99" (electronic table), September 12, 2000.

Table 1.3: Percentage Distribution of Own-Source General Revenue by Funding Dimension and Level of Government, FY 1997--A 50 State Profile/1

Own-source general receipts encompass collections from taxes, current charges, and miscellaneous funding bases (e.g., property sales, special assessments, interest-bearing deposits, and land use fees). The scope of these revenues, however, does not extend to any amounts generated by intergovernmental transfer payments or by liquor stores, utilities, and insurance trust funds failing within the proprietary control of a given state or locality. (With respect to the distribution of percentages covering a specified level of government or both levels combined, the sum of the categorical values for a particular state may differ slightly from 100% because of statistical rounding.]

Regarding the state-by-state series of percentages, the largest value is accorded the lowest rank score and the smallest value the highest rank score. In the event of tied percentages, the affected states are assigned the average magnitude of their shared rank positions.

Source: For the revenue data underlying this exhibit, see U.S. Department of Commerce, Bureau of the Census, "State and Local Government Finances by Level of Government and State: 1996-97" (electronic table), April 2, 2001.

The state/local expenditure base reflects all operating and capital outlays except (a) intergovernmental transfer payments and (b) direct disbursements relative to publicly controlled liquor stores, utilities, and insurance trust funds.

Sources: For the disbursement data underlying this exhibit, see U.S. Department of Commerce, Bureau of the Census, 'State and Local Government Finances by Level of Government and State: 1996-97' (electronic table), April 2, 2001. Regarding the per capita amounts displayed above, these values have been generated with 1996 population estimates from U.S. Department of Commerce, Bureau of the Census, 'State Population Estimates: Annual Time Series, July 1, 1990 to July 1, 1999' (electronic table), December 29, 1999.

The miscellaneous dimension captures "unallocable" outlays pertaining, for example, to civil defense programs, crime-victim assistance activities, election oversight functions, economic development projects, and job training and placement services.

With regard to the state-by-state series of per capita values, the largest amount is accorded the lowest rank score and the smallest amount the highest rank score. In the event of tied per capita values, the affected states are assigned the average magnitude of their shared rank positions.

In relation to a particular state, the per capita amount covering all dimensions may vary slightly from the sum of the categorical values because of statistical rounding.

Table 1.4: Direct General Expenditures Per Capita for Operating and Capital Functions by Outlay Dimension and Level of Government, FY 1997--A 50 State Profile/1

The state/local expenditure base reflects all operating and capital outlays except (a) intergovernmental transfer payments and (b) direct disbursements relative to publicly controlled liquor stores, utilities, and insurance trust funds.

Sources: For the disbursement data underlying this exhibit, see U.S. Department of Commerce, Bureau of the Census, 'State and Local Government Finances by Level of Government and State: 1996-97' (electronic table), April 2, 2001. Regarding the per capita amounts displayed above, these values have been generated with 1996 population estimates from U.S. Department of Commerce, Bureau of the Census, 'State Population Estimates: Annual Time Series, July 1, 1990 to July 1, 1999' (electronic table), December 29, 1999.

The miscellaneous dimension captures "unallocable" outlays pertaining, for example, to civil defense programs, crime-victim assistance activities, election oversight functions, economic development projects, and job training and placement services.

With regard to the state-by-state series of per capita values, the largest amount is accorded the lowest rank score and the smallest amount the highest rank score. In the event of tied per capita values, the affected states are assigned the average magnitude of their shared rank positions.

In relation to a particular state, the per capita amount covering all dimensions may vary slightly from the sum of the categorical values because of statistical rounding.

Table 1.5: Direct General Expenditures for Operating and Capital Functions as a Percentage of Personal Income by Outlay Dimension and Level of Government, FY 1997--A 50 State Profile/1

<sup>1</sup>The state/local expenditure base reflects all operating and capital outlays except (a) intergovernmental transfer payments and (b) direct disbursements relative to publicly controlled liquor stores, utilities, and insurance trust funds.

Sources: For the disbursement data underlying this exhibit, see U.S. Department of Commerce, Bureau of the Census, "State and Local Government Finances by Level of Government and State: 1986-97" (electronic table), April 2, 2001. Regarding the percentages displayed above, these values have been generated with 1996 income estimates from U.S. Department of Commerce, Bureau of Economic Analysis, "Regional Accounts Data: Annual State Personal Income, 1995-99" (electronic table), September 12, 2000.

The miscellaneous dimension captures "unallocable" outlays pertaining, for example, to civil defense programs, crime-victim assistance activities, election oversight functions, economic development projects, and job training and placement services.

With regard to the state-by-state series of percentages, the largest value is accorded the lowest rank score and the smallest value the highest rank score. In the event of tied percentages, the affected states are assigned the average magnitude of their shared rank positions.

In relation to a particular state, the percentage covering all dimensions may vary slightly from the sum of the categorical values because of statistical rounding.

Table 1.5: Direct General Expenditures for Operating and Capital Functions as a Percentage of Personal Income by Outlay Dimension and Level of Government, FY 1997--A 50 State Profile/1

The state/local expenditure base reflects all operating and capital outlays except (a) intergovernmental transfer payments and (b) direct disbursements relative to publicly controlled liquor stores, utilities, and insurance trust funds.

Sources: For the disbursement data underlying this exhibit, see U.S. Department of Commerce, Bureau of the Census, "State and Local Government Finances by Level of Government and State: 1986-97" (electronic table), April 2, 2001. Regarding the percentages displayed above, these values have been generated with 1996 income estimates from U.S. Department of Commerce, Bureau of Economic Analysis, "Regional Accounts Data: Annual State Personal Income, 1995-99" (electronic table), September 12, 2000.

The miscellaneous dimension captures "unallocable" outlays pertaining, for example, to civil defense programs, crime-victim assistance activities, election oversight functions, economic development projects, and job training and placement services.

With regard to the state-by-state series of percentages, the largest value is accorded the lowest rank score and the smallest value the highest rank score. In the event of tied percentages, the affected states are assigned the average magnitude of their shared rank positions.

In relation to a particular state, the percentage covering all dimensions may vary slightly from the sum of the categorical values because of statistical rounding.

Table 1.6: Percentage Distribution of Direct General Expenditures for Operating and Capital Functions by Outlay Dimension and Level of Government, FY 1997--A 50 State Profile/1

The state/local expenditure base reflects all operating and capital outlays except (a) intergovernmental transfer payments and (b) direct disbursements relative to publicly controlled liquor stores, utilities, and insurance trust funds. [With respect to the distribution of percentages covering a specified level of government or both levels combined, the sum of the categorical values for a particular state may differ slightly more than 50 to 10 to

Source: For the disbursement data underlying this exhibit, see U.S. Department of Commerce, Bureau of the Census, "State and Local Government Finances by Level of Government and State: 1996-97" (electronic table), April 2, 2001.

The miscellaneous dimension captures "unallocable" outlays pertaining, for example, to civil defense programs, crime-victim assistance activities, election oversight functions, economic development projects, and job training and placement services.

Regarding the state-by-state series of percentages, the largest value is accorded the lowest rank score and the smallest value the highest rank score. In the event of tied percentages, the affected states are assigned the average magnitude of their shared rank positions.

Table 1.6: Percentage Distribution of Direct General Expenditures for Operating and Capital Functions by Outlay Dimension and Level of Government, FY 1997-A 50 State Profile/1

The state/local expenditure base reflects all operating and capital outlays except (a) intergovernmental transfer payments and (b) direct disbursements relative to publicly controlled liquor stores, utilities, and insurance trust funds. [With respect to the distribution of percentages covering a specified level of government or both levels combined, the sum of the categorical values for a particular state may differ slightly from 100% because of statistical rounding.]

Source: For the disbursement data underlying this exhibit, see U.S. Department of Commerce, Bureau of the Census, "State and Local Government Finances by Level of Government and State: 1996-97" (electronic table), April 2, 2001.

The miscellaneous dimension captures "unallocable" outlays pertaining, for example, to civil defense programs, crime-victim assistance activities, election oversight functions, economic development projects, and job training and placement services.

Regarding the state-by-state series of percentages, the largest value is accorded the lowest rank score and the smallest value the highest rank score. In the event of tied percentages, the affected states are assigned the average magnitude of their shared rank positions.

### State and Local Government Finances by Level of Government FY 1998

<sup>1</sup> 

Own-source general receipts encompass collections from taxes, current charges, and miscellaneous funding bases (e.g., property sales, special assessments, interest-bearing deposits, and land use fees). The scope of these revenues, however, does not extend to any amounts generated by intergovernmental transfer payments or by liquor stores, utilities, and insurance trust funds falling within the proprietary control of a given state or locality.

With regard to the state-by-state series of per capita values, the largest amount is accorded the lowest rank score and the smallest amount the highest rank score. In the event of tied per capita values, the affected states are assigned the average magnitude of their shared rank positions.

In relation to a particular state, the per capita amount covering all dimensions may vary slightly from the sum of the categorical values because of statistical rounding.

Sources: For the revenue data underlying this exhibit, see U.S. Department of Commerce, Bureau of the Census, "State and Local Government Finances by Level of Government: 1997-98" (electronic tables), July 18, 2001. Regarding the per capita amounts displayed above, these values have been generated with 1997 population estimates from U.S. Department of Commerce, Bureau of the Census, "State Population Estimates: Annual Time Series, July 1, 1990 to July 1, 1999" (electronic table), December 29, 1999.

1

Own-source general receipts encompass collections from taxes, current charges, and miscellaneous funding bases (e.g., property sales, special assessments, interest-bearing deposits, and land use fees). The scope of these revenues, however, does not extend to any amounts generated by intergovernmental transfer payments or by liquor stores, utilities, and insurance trust funds falling within the proprietary control of a given state or locality.

With regard to the state-by-state series of percentages, the largest value is accorded the lowest rank score and the smallest value the highest rank score. In the event of tied percentages, the affected states are assigned the average magnitude of their shared rank positions.

In relation to a particular state, the percentage covering all dimensions may vary slightly from the sum of the categorical values because of statistical rounding.

Sources: For the revenue data underlying this exhibit, see U.S. Department of Commerce, Bureau of the Census, 'State and Local Government Finances by Level of Government: 1997-98' (electronic tables), July 18, 2001. Regarding the percentages displayed above, these values have been generated with 1997 income estimates from U.S. Department of Commerce, Bureau of Economic Analysis, 'Regional Accounts Data: Annual State Personal Income, 1997-2000' (electronic table), September 24, 2001.

Own-source general receipts encompass collections from taxes, current charges, and miscellaneous funding bases (e.g., property sales, special assessments, interest-bearing deposits, and land use fees). The scope of these revenues, however, does not extend to any amounts generated by intergovernmental transfer payments or by liquor stores, utilities, and insurance trust funds failing within the proprietary control of a given state or locality. (With respect to the distribution of percentages covering a specified level of government or both levels combined, the sum of the categorical values for a particular state may differ slightly from 100% because of statistical rounding.]

Regarding the state-by-state series of percentages, the largest value is accorded the lowest rank score and the smallest value the highest rank score. In the event of tied percentages, the affected states are assigned the average magnitude of their shared rank positions.

Source: For the revenue data underlying this exhibit, see U.S. Department of Commerce, Bureau of the Census, "State and Local Government Finances by Level of Government: 1997-98" (electronic tables), July 18, 2001.

The state/local expenditure base reflects all operating and capital outlays except (a) intergovernmental transfer payments and (b) direct disbursements relative to publicly controlled liquor stores, utilities, and insurance trust funds.

Sources: For the disbursement data underlying this exhibit, see U.S. Department of Commerce, Bureau of the Census, "State and Local Government Finances by Level of Government: 1997-96" (electronic tables), July 18, 2001. Regarding the per capita amounts displayed above, these values have been generated with 1997 population estimates from U.S. Department of Commerce, Bureau of the Census, "State Population Estimates: Annual Time Series, July 1, 1990 to July 1, 1990" (electronic table), December 29, 1999.

The miscellaneous dimension captures "unallocable" outlays pertaining, for example, to civil defense programs, crime-victim assistance activities, election oversight functions, economic development projects, and job training and placement services.

With regard to the state-by-state series of per capita values, the largest amount is accorded the lowest rank score and the smallest amount the highest rank score. In the event of tied per capita values, the affected states are assigned the average magnitude of their shared rank positions.

In relation to a particular state, the per capita amount covering all dimensions may vary slightly from the sum of the categorical values because of statistical rounding.

Table 2.4: Direct General Expenditures Per Capita for Operating and Capital Functions by Outlay Dimension and Level of Government, FY 1998--A 50 State Profile/1

The state/local expenditure base reflects all operating and capital outlays except (a) intergovernmental transfer payments and (b) direct disbursements relative to publicly controlled liquor stores, utilities, and insurance trust funds.

Sources: For the disbursement data underlying this exhibit, see U.S. Department of Commerce, Bureau of the Census, "State and Local Government Finances by Level of Government: 1997-96" (electronic tables), July 18, 2001. Regarding the per capita amounts displayed above, these values have been generated with 1997 population estimates from U.S. Department of Commerce, Bureau of the Census, "State Population Estimates: Annual Time Series, July 1, 1990 to July 1, 1990" (electronic table), December 29, 1999.

The miscellaneous dimension captures "unallocable" outlays pertaining, for example, to civil defense programs, crime-victim assistance activities, election oversight functions, economic development projects, and job training and placement services.

With regard to the state-by-state series of per capita values, the largest amount is accorded the lowest rank score and the smallest amount the highest rank score. In the event of tied per capita values, the affected states are assigned the average magnitude of their shared rank positions.

In relation to a particular state, the per capita amount covering all dimensions may vary slightly from the sum of the categorical values because of statistical rounding.

Table 2.5: Direct General Expenditures for Operating and Capital Functions as a Percentage of Personal Income by Outlay Dimension and Level of Government, FY 1998--A 50 State Profile/1

The state/local expenditure base reflects all operating and capital outlays except (a) intergovernmental transfer payments and (b) direct disbursements relative to publicly controlled liquor stores, utilities, and insurance trust funds.

Sources: For the disbursement data underlying this exhibit, see U.S. Department of Commerce, Bureau of the Census, "State and Local Government Finances by Level of Government: 1997-96" (electronic tables), July 18, 2001. Regarding the percentages displayed above, these values have been generated with 1997 income estimates from U.S. Department of Commerce, Bureau of Economic Analysis, "Regional Accounts Data: Annual State Personal Income, 1997-2000" (electronic table), September 24, 2001.

The miscellaneous dimension captures "unallocable" outlays pertaining, for example, to civil defense programs, crime-victim assistance activities, election oversight functions, economic development projects, and job training and placement services.

With regard to the state-by-state series of percentages, the largest value is accorded the lowest rank score and the smallest value the highest rank score. In the event of tied percentages, the affected states are assigned the average magnitude of their shared rank positions.

In relation to a particular state, the percentage covering all dimensions may vary slightly from the sum of the categorical values because of statistical rounding.

Table 2.5: Direct General Expenditures for Operating and Capital Functions as a Percentage of Personal Income by Outlay Dimension and Level of Government, FY 1998--A 50 State Profile/1

The state/local expenditure base reflects all operating and capital outlays except (a) intergovernmental transfer payments and (b) direct disbursements relative to publicly controlled liquor stores, utilities, and insurance trust funds.

Sources: For the disbursement data underlying this exhibit, see U.S. Department of Commerce, Bureau of the Census, "State and Local Government Finances by Level of Government: 1997-96" (electronic tables), July 18, 2001. Regarding the percentages displayed above, these values have been generated with 1997 income estimates from U.S. Department of Commerce, Bureau of Economic Analysis, "Regional Accounts Data: Annual State Personal Income, 1997-2000" (electronic table), September 24, 2001.

The miscellaneous dimension captures "unallocable" outlays pertaining, for example, to civil defense programs, crime-victim assistance activities, election oversight functions, economic development projects, and job training and placement services.

With regard to the state-by-state series of percentages, the largest value is accorded the lowest rank score and the smallest value the highest rank score. In the event of tied percentages, the affected states are assigned the average magnitude of their shared rank positions.

In relation to a particular state, the percentage covering all dimensions may vary slightly from the sum of the categorical values because of statistical rounding.

Table 2.6: Percentage Distribution of Direct General Expenditures for Operating and Capital Functions by Outlay Dimension and Level of Government, FY 1998--A 50 State Profile/1

The stateflocal expenditure base reflects all operating and capital outlays except (a) intergovernmental transfer payments and (b) direct disbursements relative to publicly controlled liquor stores, utilities, and insurance trust funds. [With respect to the distribution of percentages covering a specified level of government or both levels combined, the sum of the categorical values for a particular state may differ slighten 10% because of statistical rounding.]

Source: For the disbursement data underlying this exhibit, see U.S. Department of Commerce, Bureau of the Census, "State and Local Government Finances by Level of Government: 1997-98" (electronic tables), July 18, 2001.

The miscellaneous dimension captures "unallocable" outlays pertaining, for example, to civil defense programs, crime-victim assistance activities, election oversight functions, economic development projects, and job training and placement services.

Regarding the state-by-state series of percentages, the largest value is accorded the lowest rank score and the smallest value the highest rank score. In the event of tied percentages, the affected states are assigned the average magnitude of their shared rank positions.

Table 2.6: Percentage Distribution of Direct General Expenditures for Operating and Capital Functions by Outlay Dimension and Level of Government, FY 1998--A 50 State Profile/1

The state/local expenditure base reflects all operating and capital outlays except (a) intergovernmental transfer payments and (b) direct disbursements relative to publicly controlled iiquor stores, utilities, and insurance trust funds. [With respect to the distribution of percentages covering a specified level of government or both levels combined, the sum of the categorical values for a particular state may differ slightly from 100% because of statistical rounding.]

Source: For the disbursement data underlying this exhibit, see U.S. Department of Commerce, Bureau of the Census, "State and Local Government Finances by Level of Government: 1997-98" (electronic tables), July 18, 2001.

The miscellaneous dimension captures "unallocable" outlays pertaining, for example, to civil defense programs, crime-victim assistance activities, election oversight functions, economic development projects, and job training and placement services.

Regarding the state-by-state series of percentages, the largest value is accorded the lowest rank score and the smallest value the highest rank score. In the event of tied percentages, the affected states are assigned the average magnitude of their shared rank positions.

#### State and Local Government Finances by Level of Government FY 1999

1

Own-source general receipts encompass collections from taxes, current charges, and miscellaneous funding bases (e.g., property sales, special assessments, interest-bearing deposits, and land use fees). The scope of these revenues, however, does not extend to any amounts generated by intergovernmental transfer payments or by liquor stores, utilities, and insurance trust funds falling within the proprietary control of a given state or locality.

With regard to the state-by-state series of per capita values, the largest amount is accorded the lowest rank score and the smallest amount the highest rank score. In the event of tied per capita values, the affected states are assigned the average magnitude of their shared rank positions.

In relation to a particular state, the per capita amount covering all dimensions may vary slightly from the sum of the categorical values because of statistical rounding.

Sources: For the revenue data underlying this exhibit, see U.S. Department of Commerce, Bureau of the Census, "State and Local Government Finances by Level of Government: 1998-99" (electronic tables), September 10, 2001. Regarding the per capita amounts displayed above, these values have been generated with 1998 population estimates from U.S. Department of Commerce, Bureau of the Census, "State Population Estimates: Annual Time Series, July 1, 1990 to July 1, 1999" (electronic table), December 29, 1999.

Table 3.2: Own-Source General Revenue as a Percentage of Personal Income by Funding Dimension and Level of Government, FY 1999--A 50 State Profile/1

1

Own-source general receipts encompass collections from taxes, current charges, and miscellaneous funding bases (e.g., property sales, special assessments, interest-bearing deposits, and land use fees). The scope of these revenues, however, does not extend to any amounts generated by intergovernmental transfer payments or by liquor stores, utilities, and insurance trust funds falling within the proprietary control of a given state or locality.

With regard to the state-by-state series of percentages, the largest value is accorded the lowest rank score and the smallest value the highest rank score. In the event of tied percentages, the affected states are assigned the average magnitude of their shared rank positions.

In relation to a particular state, the percentage covering all dimensions may vary slightly from the sum of the categorical values because of statistical rounding.

Sources: For the revenue data underlying this exhibit, see U.S. Department of Commerce, Bureau of the Census, "State and Local Government Finances by Level of Government: 1998-99" (electronic tables), September 10, 2001. Regarding the percentages displayed above, these values have been generated with 1998 income estimates from U.S. Department of Commerce, Bureau of Economic Analysis, "Regional Accounts Data: Annual State Personal Income, 1997-2000" (electronic table), September 24, 2001.

Own-source general receipts encompass collections from taxes, current charges, and miscellaneous funding bases (e.g., property sales, special assessments, interest-bearing deposits, and land use fees). The scope of these revenues, however, does not extend to any amounts generated by intergovernmental transfer payments or by liquor stores, utilities, and insurance trust funds failing within the proprietary control of a given state or locality. (With respect to the distribution of percentages covering a specified level of government or both levels combined, the sum of the categorical values for a particular state may differ slightly from 100% because of statistical rounding.]

Regarding the state-by-state series of percentages, the largest value is accorded the lowest rank score and the smallest value the highest rank score. In the event of tied percentages, the affected states are assigned the average magnitude of their shared rank positions.

The state/local expenditure base reflects all operating and capital outlays except (a) intergovernmental transfer payments and (b) direct disbursements relative to publicly controlled liquor stores, utilities, and insurance trust funds.

Sources: For the disbursement data underlying this exhibit, see U.S. Department of Commerce, Bureau of the Census, "State and Local Government Finances by Level of Government: 1998-99" (electronic tables), September 10, 2001. Regarding the per capita amounts displayed above, these values have been generated with 1998 population estimates from U.S. Department of Commerce, Bureau of the Census, "State Population Estimates: Annual Time Series, July 1, 1990 to July 1, 1999" (electronic table), December 29, 1999.

The miscellaneous dimension captures "unallocable" outlays pertaining, for example, to civil defense programs, crime-victim assistance activities, election oversight functions, economic development projects, and job training and placement services.

With regard to the state-by-state series of per capita values, the largest amount is accorded the lowest rank score and the smallest amount the highest rank score. In the event of tied per capita values, the affected states are assigned the average magnitude of their shared rank positions.

In relation to a particular state, the per capita amount covering all dimensions may vary slightly from the sum of the categorical values because of statistical rounding.

Table 3.4: Direct General Expenditures Per Capita for Operating and Capital Functions by Outlay Dimension and Level of Government, FY 1999--A 50 State Profile/1

The state/local expenditure base reflects all operating and capital outlays except (a) intergovernmental transfer payments and (b) direct disbursements relative to publicly controlled liquor stores, utilities, and insurance trust funds.

Sources: For the disbursement data underlying this exhibit, see U.S. Department of Commerce, Bureau of the Census, "State and Local Government Finances by Level of Government: 1998-99" (electronic tables), September 10, 2001. Regarding the per capita amounts displayed above, these values have been generated with 1998 population estimates from U.S. Department of Commerce, Bureau of the Census, "State Population Estimates: Annual Time Series, July 1, 1990 to July 1, 1999" (electronic table), December 29, 1999.

The miscellaneous dimension captures "unallocable" outlays pertaining, for example, to civil defense programs, crime-victim assistance activities, election oversight functions, economic development projects, and job training and placement services.

With regard to the state-by-state series of per capita values, the largest amount is accorded the lowest rank score and the smallest amount the highest rank score. In the event of tied per capita values, the affected states are assigned the average magnitude of their shared rank positions.

In relation to a particular state, the per capita amount covering all dimensions may vary slightly from the sum of the categorical values because of statistical rounding.

Table 3.5: Direct General Expenditures for Operating and Capital Functions as a Percentage of Personal Income by Outlay Dimension and Level of Government, FY 1999--A 50 State Profile/1

The state/local expenditure base reflects all operating and capital outlays except (a) intergovernmental transfer payments and (b) direct disbursements relative to publicly controlled liquor stores, utilities, and insurance trust funds.

Sources: For the disbursement data underlying this exhibit, see U.S. Department of Commerce, Bureau of the Census, "State and Local Government Finances by Level of Government: 1998-99" (electronic tables), September 10, 2001. Regarding the percentages displayed above, these values have been generated with 1998 income estimates from U.S. Department of Commerce, Bureau of Economic Analysis, "Regional Accounts Data: Annual State Personal Income, 1997-2000" (electronic table), September 24, 2001.

The miscellaneous dimension captures "unallocable" outlays pertaining, for example, to civil defense programs, crime-victim assistance activities, election oversight functions, economic development projects, and job training and placement services.

With regard to the state-by-state series of percentages, the largest value is accorded the lowest rank score and the smallest value the highest rank score. In the event of tied percentages, the affected states are assigned the average magnitude of their shared rank positions.

In relation to a particular state, the percentage covering all dimensions may vary slightly from the sum of the categorical values because of statistical rounding.

Table 3.5: Direct General Expenditures for Operating and Capital Functions as a Percentage of Personal Income by Outlay Dimension and Level of Government, FY 1999--A 50 State Profile/1

<sup>1</sup>The state/local expenditure base reflects all operating and capital outlays except (a) intergovernmental transfer payments and (b) direct disbursements relative to publicly controlled liquor stores, utilities, and insurance trust funds.

Sources: For the disbursement data underlying this exhibit, see U.S. Department of Commerce, Bureau of the Census, "State and Local Government Finances by Level of Government: 1988-99" (electronic tables), September 10, 2001. Regarding the percentages displayed above, these values have been generated with 1998 income estimates from U.S. Department of Commerce, Bureau of Economic Analysis, "Regional Accounts Data: Annual State Personal Income, 1997-2000" (electronic table), September 24, 2001.

The miscellaneous dimension captures "unallocable" outlays pertaining, for example, to civil defense programs, crime-victim assistance activities, election oversight functions, economic development projects, and job training and placement services.

With regard to the state-by-state series of percentages, the largest value is accorded the lowest rank score and the smallest value the highest rank score. In the event of tied percentages, the affected states are assigned the average magnitude of their shared rank positions.

In relation to a particular state, the percentage covering all dimensions may vary slightly from the sum of the categorical values because of statistical rounding.

Table 3.6: Percentage Distribution of Direct General Expenditures for Operating and Capital Functions by Outlay Dimension and Level of Government, FY 1999--A 50 State Profile/1

The state/local expenditure base reflects all operating and capital outlays except (a) intergovernmental transfer payments and (b) direct disbursements relative to publicly controlled liquor stores, utilities, and insurance trust funds. [With respect to the distribution of percentages covering a specified level of government or both levels combined, the sum of the categorical values for a particular state and effect slightly from 100% because of statistical rounding.]

Source: For the disbursement data underlying this exhibit, see U.S. Department of Commerce, Bureau of the Census, "State and Local Government Finances by Level of Government: 1998-99" (electronic tables), September 10, 2001.

The miscellaneous dimension captures "unallocable" outlays pertaining, for example, to civil defense programs, crime-victim assistance activities, election oversight functions, economic development projects, and job training and placement services.

Regarding the state-by-state series of percentages, the largest value is accorded the lowest rank score and the smallest value the highest rank score. In the event of tied percentages, the affected states are assigned the average magnitude of their shared rank positions.

Table 3.6: Percentage Distribution of Direct General Expenditures for Operating and Capital Functions by Outlay Dimension and Level of Government, FY 1999--A 50 State Profile/1

<sup>1</sup>The state/local expenditure base reflects all operating and capital outlays except (a) intergovernmental transfer payments and (b) direct disbursements relative to publicly controlled liquor stores, utilities, and insurance trust funds. [With respect to the distribution of percentages covering a specified level of government or both levels combined, the sum of the categorical values for a particular state may differ slightly from 100% because of statistical rounding.]

Source: For the disbursement data underlying this exhibit, see U.S. Department of Commerce, Bureau of the Census, "State and Local Government Finances by Level of Government: 1998-99" (electronic tables), September 10, 2001.

Ze The miscellaneous dimension captures "unallocable" outlays pertaining, for example, to civil defense programs, crime-victim assistance activities, election oversight functions, economic development projects, and job training and placement services.

Regarding the state-by-state series of percentages, the largest value is accorded the lowest rank score and the smallest value the highest rank score. In the event of tied percentages, the affected states are assigned the average magnitude of their shared rank positions.
